A different company

TOGETHER, TO GO FURTHER.

The history of trees written in wood teaches us that in every transformation, something is preserved. In a tree trunk, each new ring adds new strength, while building on the foundation of the past. By joining forces, we have written a new story, while preserving those histories which have led us this far.

Three leading companies in the production of wood-processing tools. Three "Made in Rovereto" brands, renowned throughout Italy and the world. Three formerly different entities that today run side by side towards the challenges of the international market.

**Garniga, Zuani and Rekord,
united as TWT.**

**“THREE STORIES BECOME ONE,
GIVING A NEW NAME TO
ITALIAN EXCELLENCE”**

2018

GLOBALTOOLS

TWT launches the new GlobalTools catalogue, an accurate selection of wood, aluminum and composite metal working tools.

2017

4LIFE

Creation of the new 4Life fastening system, a revolutionary advance in technology for manufacturing wooden doors and windows.

2016

TWT

Garniga, Zuani and Rekord merge into TWT, the Italian and European leader in the production of tools for wood, aluminum and composite material working.

1965

GARNIGA

Establishment of Garniga, dedicated to engineering woodworking tools with interchangeable inserts. It was one of the first companies in the world to pioneer mechanical insert fastening systems.

1972

ZUANI

Establishment of Zuani in the same woodworking sector, devoted to investing in research and innovation since its foundation. It was the first company to start working with the University of Trento in designing its products.

1982

REKORD

Establishment of Rekord, the first company to design tools to craft wooden frames with a single shaped insert, thus increasing productivity while reducing process costs.

OUR MISSION

Every tool is designed to simplify a more complex operation. Simplification, however, is never simple.

TWT's mission is to bring together **technology, craftsmanship** and high-quality **raw materials** into a single focal point: the actual **functionality of our tools**. Our primary objective is to **simplify your work**.

***Research and Innovation** in our technical solutions helps us lead the industry and anticipate our clients' needs.

***Individual and team responsibility** keeps our workforce focused and cohesive.

***Social integration and environmental sustainability** ensures our company's success is tied to the wellbeing and health of our local community. These are the fundamental values that have made TWT the **partner of reference** for materials processing, be it wood, aluminum, composite material, plastic or fibre. We are recognized as the industry leader both at home in Italy, and across the world.

OUR PRODUCTS

TWT products are the result of different research paths explored in over 50 years of activity by Garniga, Zuani and Rekord. We have distilled the best from each experience, so that our solutions may support you in your work via an increasingly diversified offering, in line with our company values.

Win&Doors

Our core business is the production of high precision tools for the production of wood and wood/aluminum doors and windows. We study each and every technical element to achieve the perfect blend of quality, functional capacity and innovation in our final products. Our Newform Aluflex and Esperia Life systems are fully configurable, easy to install, feature excellent performance and are of modern design.

NaDia Coating

TWT's work with the Faculty of Physics of the University of Trento and the Bruno Kessler Foundation has led a revolution in nanostructured treatment for cutting tool inserts.

NaDia Diamond Coating guarantees a 300% increase in overall tool efficiency, maximum performance to longevity ratio, and a reduction in time spent on maintenance and replacement.

GlobalTools

This is a new TWT production line featuring a careful selection of the best technological solutions in the field of HW, HS and PCD tools for the processing of wood, composite materials, aluminum and plastics.

True to our company philosophy, each TWT tool is designed and manufactured in Italy, as a further guarantee of quality and reliability.

OUR SERVICES

Tailor-made design

For us at TWT, **designing means bringing faraway worlds closer together.** This means optimizing our tools to the highest levels of technical efficacy, to reduce maintenance costs and increase efficiency for every process type. It means using state of the art technology to improve our design, engineering, and production, bringing the present closer to the future.

It is bringing each tool closer to our clients' needs by studying their feedback, scheduling, patterns in work history, and experiences with our tools. This is why we design our tools for door and window systems in close cooperation with your team. We work alongside you to become valued partners in your success.

Consulting and technical assistance

We are at your side not only during designing, but also in all the subsequent phases.

Our consulting services are yet another tool available to you. Our goals are to optimize your experience with each tool, and to work closely with you to discover opportunities for increased efficiency and growth.

OUR BRANCHES

With the combined expertise and experience of Garniga, Zuani and Rekord, TWT is recognized internationally as an industry leader, with distinguished partnerships throughout Europe, and around the world.

Currently, one of our main expansion markets is Europe, in which we actively operate through our German and Spanish branches.

Our objective is to continue exporting Italian excellence throughout the world in the years to come.

BEHIND TECHNOLOGY

Our people are the heart and soul of TWT. Our first priority is to build tools which meet human needs. Building a truly innovative design requires a full understanding of your situation. That is why when you contact us, you can expect our team to carefully listen to your unique challenges before building a detailed proposal to meet them.
